Vision and Future Capabilities Workshop

Objectives

- **Develop a vision of future soldier capabilities**
- **Develop a vision of the technologies needed to support those capabilities**
- **Begin a dialogue among stakeholders, leading to the development of those technologies**

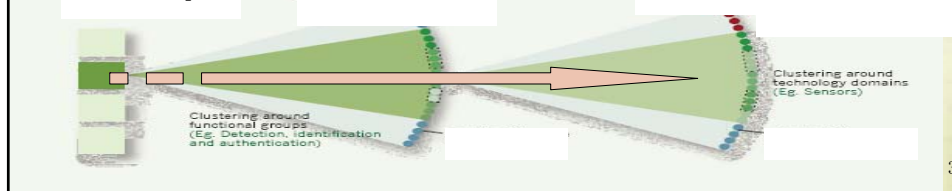

A graphical representation

Vision and Future Capabilities Workshop

The Process

- Presentations on the broad requirements
- Presentations on individual capability domains
- Discussions
- Reporting back
- Compilation

The Individual Capability Domains

- **Energy/Power & Sustainability**
- **C4I / Sensors**
- **Clothing, Footwear, Load Carriage, Survivability, Personal Protective Equipment**
- **Lethal and Non-lethal Weapons**

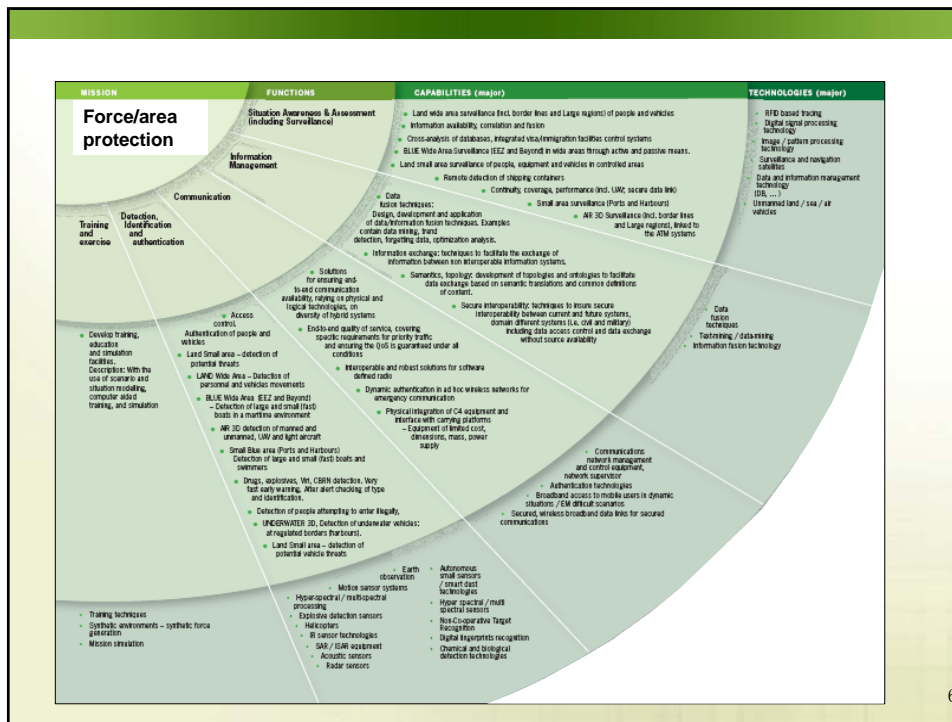

- **All anchored to soldier-level integration**

4

The Discussions at Each Table

- **Mix of participants**
- **Encourage interaction**
- **Specific questions**
- **Facilitators**
- **Record of the discussions**

5

Reporting Back

- Record on flip charts (three sheets)
- A few tables selected
- Will collect all at the end

The Product

- Results compiled into a Visioning and Future Capabilities Report
- Underpin the upcoming Technical Workshops
- Available to all

8

Summary

- This is the beginning of a larger exercise
- The purpose is to foster a discussion between a range of stakeholders
- Capture your thoughts
- “Success” means:
 - Discussion
 - Contribution
 - Interest and curiosity
 - Commitment

9

Therefore, after lunch break today ...

- **Sit with people from other organizations**
- **“Cards” for selected representatives:**
 - Blue: federal department, non-research
 - Green: Researcher with a federal laboratory
 - Red: National Research Council, not researcher
- **Fill the tables**
- **Tables #9 and #10 will be for discussions in French**
- **Choose a leader and recorder**
- **Write clearly**
- **Focus on the questions**
- **Ask facilitators for clarifications**
- **Stay at that table for tomorrow**
