Land Force C4ISR Strategy

LCol Walter Wood, DLR 4

★ Functional Concept **NETWORK ENABLED**

Leveraging the military advantages that the effective integration of information systems (both technological and human) can produce through the creation and exploitation of information

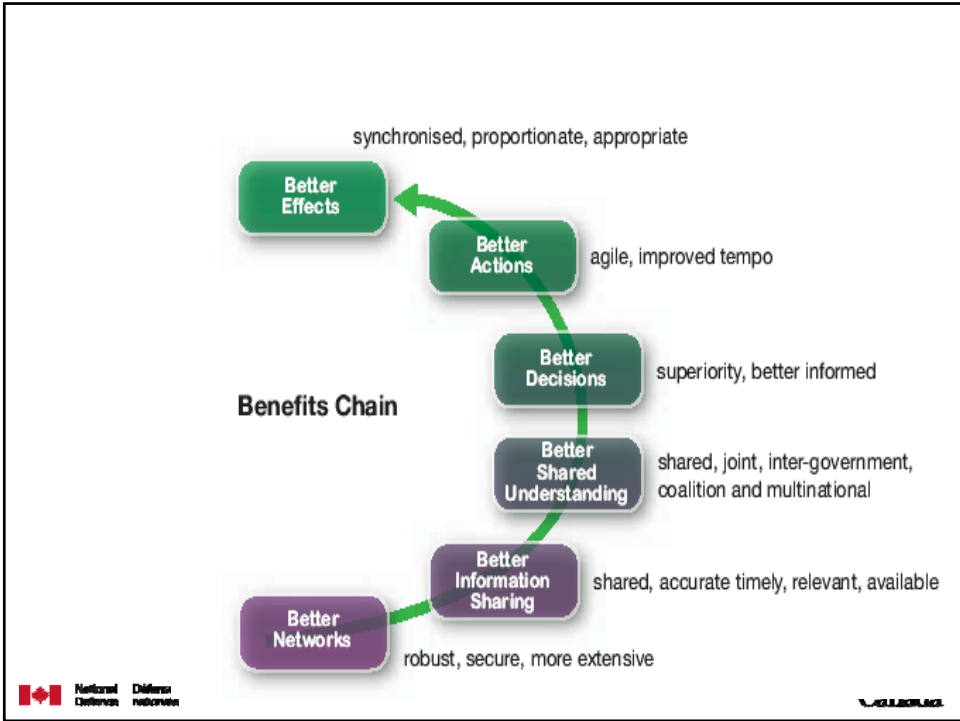

LF C4ISR Strategy

End State / "Vision":

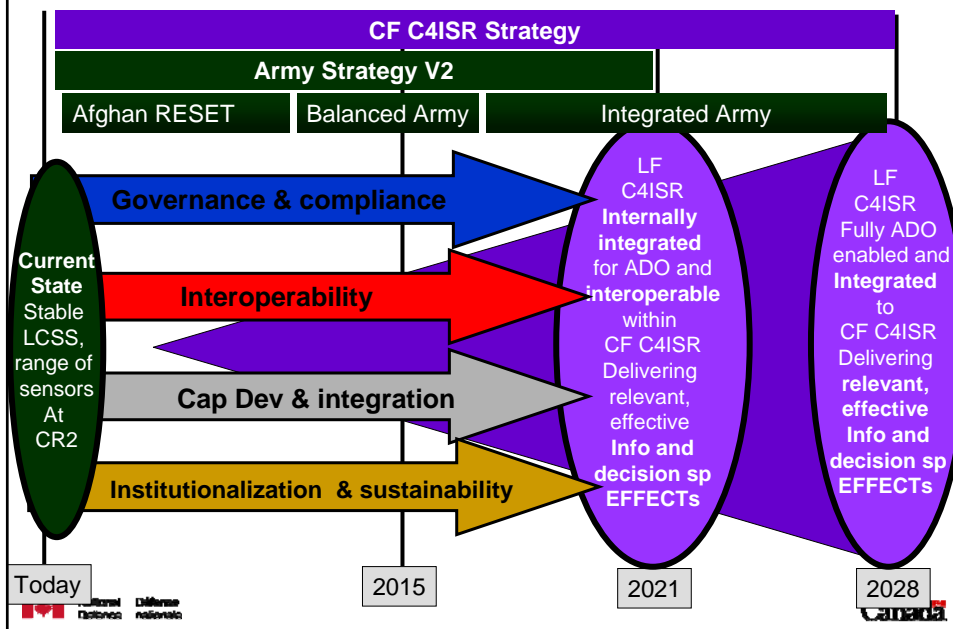

- To enable land tactical adaptive dispersed operations (ADO) in a JIMP context by coherently and deliberately providing an evolving sustainable, fully secure, integrated, and interoperable network enabled, command centric, C4ISR capability, that is relevant and flexible to the land ops community and is synchronized with Army and CF Program objectives.

Primary impediment (Adversary CofG)
Incohérent and undisciplined effort

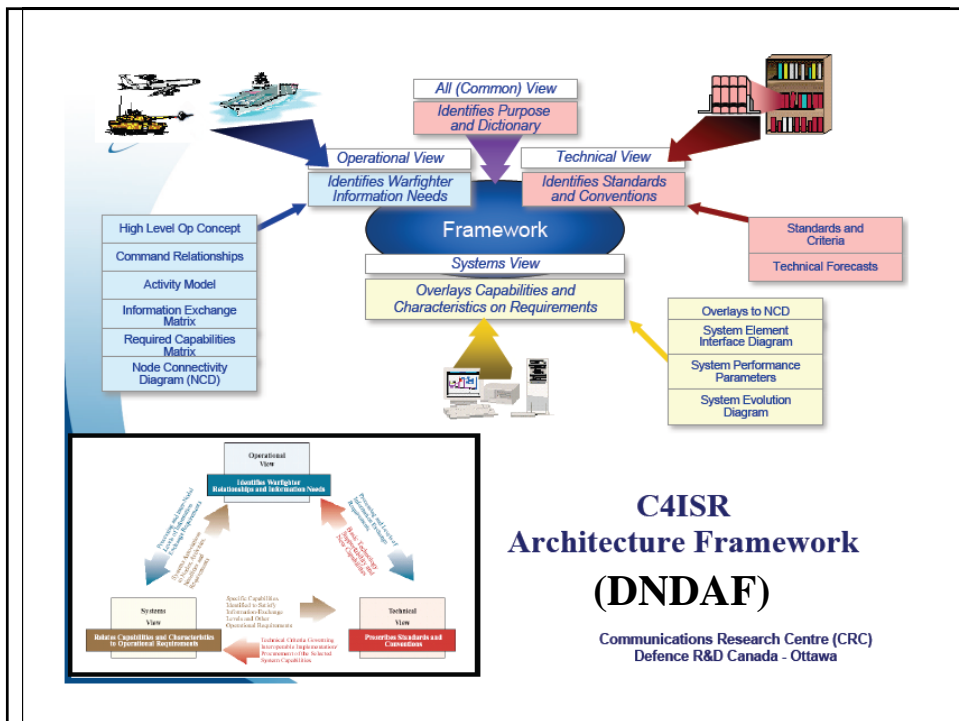

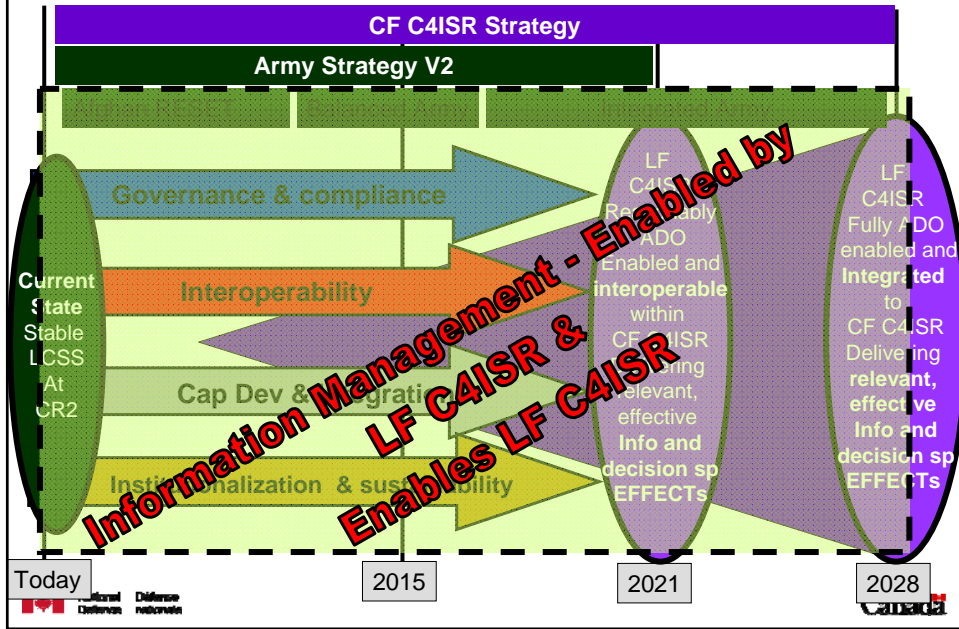

Army Strength (Friendly CofG)
A foundation capability from which to work
(technology, people, experience)

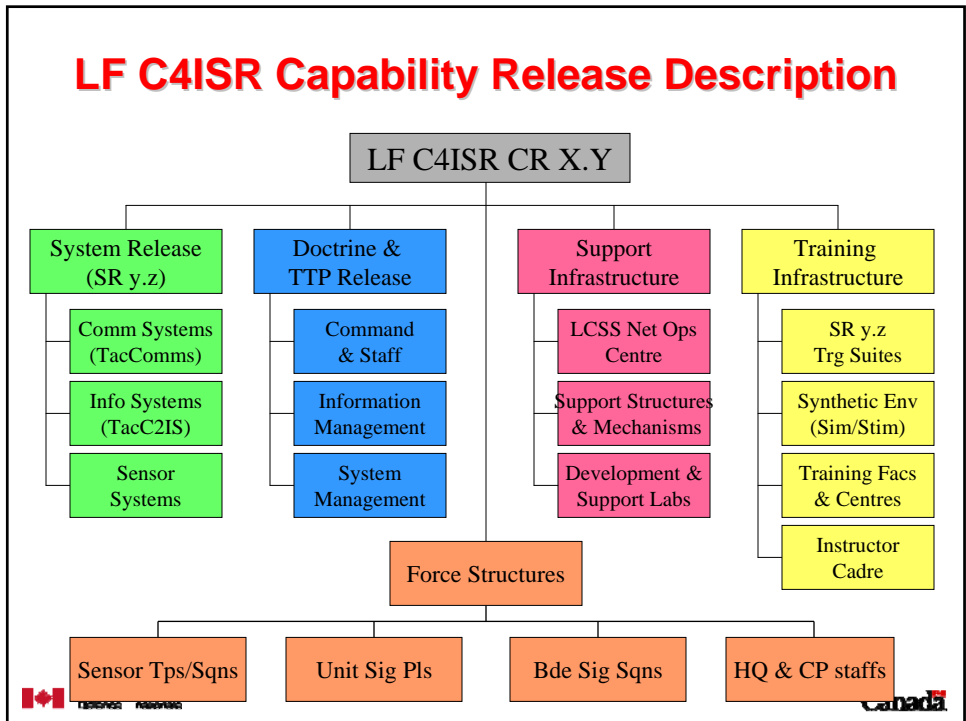

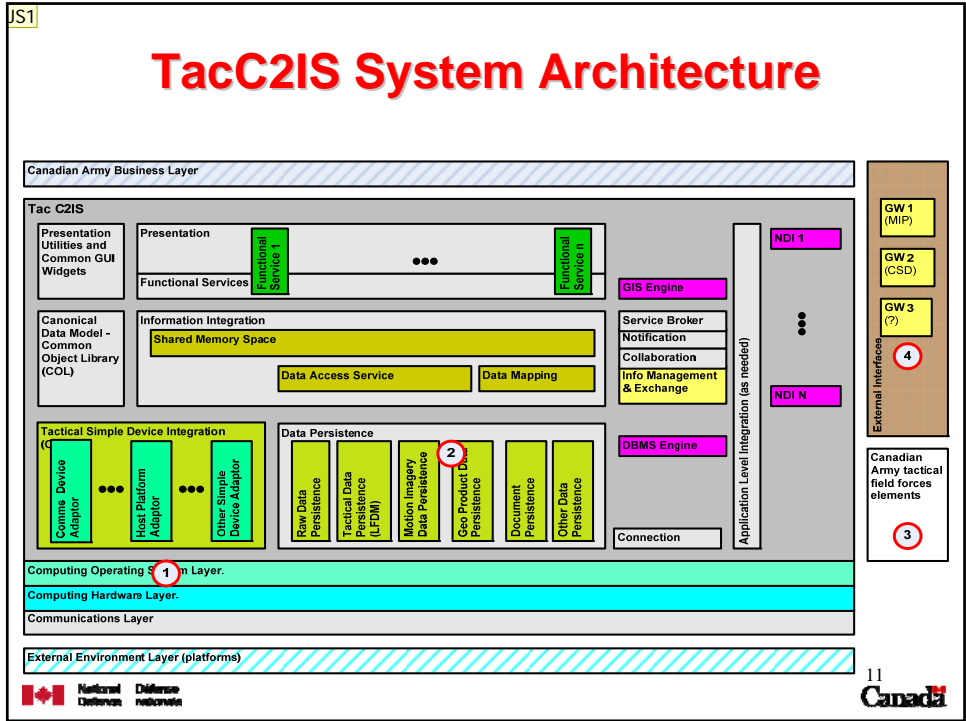

Delivering Coherent LF C4ISR

Delivering Coherent LF C4ISR

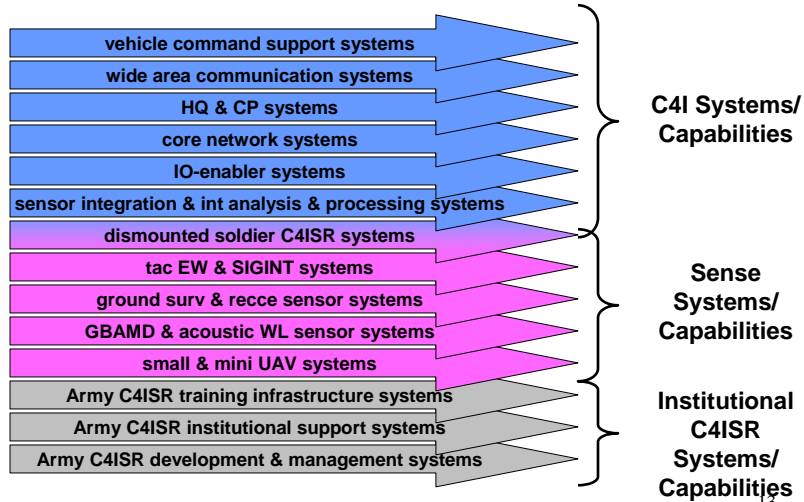

Slide 11

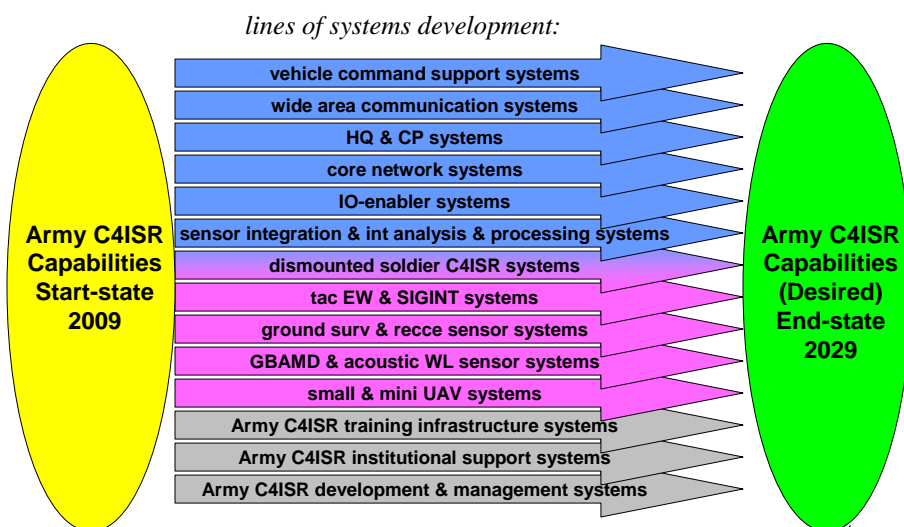

JS1 This diagram will need to be updated. Animation will need to be added to explain the flow of tactical information.

Johnny Slater; 2007-09-24
